

# Dural Tag

Dural Tag, the World's most advanced and secure Hard Tag solution is ideal for protection of high end garments, or for use in stores which are categorised in high risk areas. Using a unique detaching platform, the Dural Tag cannot be detached using conventional magnetic release detacher; is fire retardant, and designed so it is not easily crushed by pliers.

The high end design of the Dural Tag allows private branding, meaning retailers are more comfortable in attaching the Dural Tag in more prominent locations on garments. This provides a much stronger visual deterrent than covert tagging, and also reduces the likelihood that the Dural Tag will be cut out in discreet locations in the store such as changing rooms.

## Features

- European Manufactured.
- Patented 16,000 Gauss Magnetic Release Locking System.
- Outstanding EAS detection, with non-magnetic pin to further enhance performance.
- Manufactured from High Grade ABS, Polycarbonate and Teluran to provide a fire resistant, high strength Hard Tag.
