

easigrip

Reusable Solution

A simple to apply and remove box protection tag **easigrip** provides an increased level of security for high-priced merchandise. Allowing nearly all the information and graphics to remain visible, **easigrip** “locks” the merchandise within the packaging.

While the **easigrip** itself is an effective deterrent, the flashing LED when armed increases the effect on would-be thieves. Self alarming, when a thief tampers with **easigrip** (cuts the cable), it emits an 80db alarm. Should the thief try to leave the store without removing the **easigrip**, it activates most EAS systems. The internal battery provides a 700-day continuous battery life.

The **easigrip** mini offers a compatible look for lower value products requiring protection beyond EAS labels. No internal alarm but integrated EAS tags, the **easigrip** mini provides another layer of protection.

Easigrip

Easigrip mini

Features

- Internal alarm sounds when cables are cut (2 and 3 alarm versions)
- Integrated EAS alarms exit systems
- Cable length expands flexibility of tagging a variety of merchandise with a single product
- Simple to attach and easily removed with a magnetic detacher
- Low cost, miniature version with only EAS alarm functionality available (1 alarm version)
- Self Alarms when travelling through an EAS system
