

EcoWrap

Mother Nature's AM and RF Security Tags

The EcoWrap enhances TAG's patented Self Seal Tag product range as a cost effective, environmentally friendly security wrap for protection of large of high value boxed product. Combining either an AM or RF element with a self adhesive wrap, it act as a closure device for packaging, therefore reducing cost of application versus a two-step process, and greatly increasing point of sale efficiencies when compared to Spider Wrap products. The EcoWrap is deactivated at the point of sale with standard EAS deactivation hardware.

Unlike all other products in the Seal Tag range, The EcoWrap has no backing paper, a large contributor to the volume of waste products generated in the store. This reduction in waste materials, combined with a reduction in shipping costs and in raw materials establishes the EcoWrap as the leading Wrap solution in TAG's portfolio.

EcoWrap

Product Specifications

Label Printed Artwork (Fully Customisable)

Content: Security Protected
Color: Printed white and black on clear material using opaque inks

Materials

Label : Top Transparent
Adhesive : Clear high tack, permanent with excellent clarity and UV resistance

Environmental Constraints

Shelf life: One year from date of manufacture when labels are stored between 5°C – 22°C and 45-50% RH
Storage: Store at room temperature: 15°C min – 22°C max (59°F - 71°F)

Product Codes
