

The Guardian

Ideal for use on end-cap displays, stand-alone product islands or countertops, The Guardian is innovative, versatile and designed to provide loss prevention solutions in a wide range of retail applications. Protecting cell phones, cameras, PDAs, MP3 players, etc.

The Guardian works with most existing Protex sensors. Programmable features and compatibility with magnetic contacts make it a unique solution for protecting showcases.

While The Guardian has an optional AC power supply, the standard battery operation offers flexibility of use in almost any retail configuration.

The Guardian protects valuable items like collectibles, handbags, briefcases and clothing; it also has applications with showcase doors and gates.
