

# Lanyard Tag (RF)

## Hard tag with integrated lanyard

The Lanyard Tag combines a tag, pin, and lanyard into one reusable unit replacing the three part assembly used for those “hard to tag” items. The tag’s one-piece construction significantly reduces tagging time and eliminates multiple storage bins and product purchases. Tag, pin and lanyard combination is replaced with one product.

The Lanyard Tag with lanyard provides strength and versatility to protect both hard and soft goods with the most advanced technology available on the market today in this size tag.

## Features

- Reusable Tag made of fire retardant plastic
- Simple to attach and easily removed with a special detacher

## Product Specifications

Product Code	LAN.TAG.RF.ST.
