

Versatility

Tap into the power of Versatility to secure your merchandise and enjoy the freedom of Power and Security or Security-Only protection. Perfect for cell phones, MP3 players, cameras and other hand-held electronic devices, Versatility offers three angles to display your products. 30°, 60° or 90° presentation possibilities allow for the most eye-catching angle for your products.

Designed to protect with minimal impact on the appearance of your displays, Versatility offers a voltage-programmable stand, ultra-light sensor and multi-purpose power cables that fit many electronic devices. Its low-profile ensures products are highlighted. The Power and

Security Versatility Stand and Sensors can operate from either a 12-port Alarm Control Unit (ACU) or PowerPro Satellite. Versatility has arrived on the scene to bring your displays into the 21st Century with style and the ultimate in security.

Versatility

Features

- Programmable Stand allows for ultra-light sensor weight.
- Sensor Head with Magnetic Assist to automatically correct product placement.
- Three position options include interchangeable 30°, 60° or 90° product display angle tubes.
- Retrofits into most current display options
- Low-profile security allows products to stand out
- Uses same power cables used with PowerPro or SinglePro
- Cost-effective power cables not affected by voltage limitations
- 12-port ACU serves as common power and alarm source
