

iTag (66kHz)

The iTag, developed in collaboration with one of the UK's leading apparel retailers meets the requirements of both Loss Prevention and marketing. Branded with a retailer specific logo, it combines a 66kHz EAS element with a 360 degree ink vial to fully protect the pin from being removed. The ink shield perfectly matches the size and shape of the EAS backing, and also provides a raised internal rim to provide the ultimate protection against illicit removal. Available in black or custom colours, the iTag is designed for high end retailers with a desirable product and an eye on detail.

Also available in 58KHz AM and 8.2MHz RF.

Features

- Reusable tags made of fire retardant plastic
- Simple to attach and easily removed
- Wide detection range w/ 66 kHz

Product Specifications

Code	4501-890 (Tag)	4502-890 (Pin)
Box quantity	500 per box	
Size	48 mm x 48 mm	
Lock	Super	
Colour	White	
Weight	28g	
Detection	Suitable for loops	
Pin	Included
